

CLAIM AMENDMENTS

Claims 1-12 (canceled).

Claim 13 (new): A mask, comprising:

a mask body having a stabling strap adapted for a user to wear at a position that said mask body covers a mouth and nose area of said user;

an eye protection film affixed to an upper periphery of said mask body so as to substantially support said eye protection film at a position close to an upper facial area of said user when said mask body is worn, wherein said eye protection film is made of flexible and twistable material and is adapted to be deformed according to a facial contour of said user; and

an adhesive band, having a predetermined thickness, having a user adhesion side which is provided on a film periphery of said eye protection film and is adapted for placing on said user's face to maintain said eye protection film with a predetermined distance away from said user with respect to said facial contour of said user and to seal foreign objects, viruses or bacteria from said user's face.

Claim 14 (new): The mask, as recited in claim 13, wherein said eye protection film is made of polypropylene.

Claim 15 (new): The mask, as recited in claim 13, wherein said adhesive band further comprises a parting covering said user adhesion side when said adhesive band is not in use, wherein said parting is removed when said mask is in use.

Claim 16 (new): The mask, as recited in claim 14, wherein said adhesive band further comprises a parting covering said user adhesion side when said adhesive band is not in use, wherein said parting is removed when said mask is in use.

Claim 17 (new): The mask, as recited in claim 15, wherein said parting has a plurality of tear off lines that allows said parting to be selectively torn off for comfortably fitting said facial contour of said user.

Claim 18 (new): The mask, as recited in claim 16, wherein said parting has a plurality of tear off lines that allows said parting to be selectively torn off for comfortably fitting said facial contour of said user.

Claim 19 (new): The mask, as recited in claim 13, wherein said stabling strap comprises two ear hanging straps for wearing at user's ears respectively so as to retain said mask body in position.

Claim 20 (new): The mask, as recited in claim 16, wherein said stabling strap comprises two ear hanging straps for wearing at user's ears respectively so as to retain said mask body in position.

Claim 21 (new): The mask, as recited in claim 18, wherein said stabling strap comprises two ear hanging straps for wearing at user's ears respectively so as to retain said mask body in position.

Claim 22 (new): The mask, as recited in claim 13, further comprising a nose adjusting piece formed at said upper periphery of said mask body, wherein said nose adjusting piece is adapted to be deformed for fitting at said nose of said user according to a nose contour of said user so as to enforce said eye protection film to be deformed at said upper periphery of said mask body.

Claim 23 (new): The mask, as recited in claim 18, further comprising a nose adjusting piece formed at said upper periphery of said mask body, wherein said nose adjusting piece is adapted to be deformed for fitting at said nose of said user according to a nose contour of said user so as to enforce said eye protection film to be deformed at said upper periphery of said mask body.

Claim 24 (new): The mask, as recited in claim 21, further comprising a nose adjusting piece formed at said upper periphery of said mask body, wherein said nose adjusting piece is adapted to be deformed for fitting at said nose of said user according to a nose contour of said user so as to enforce said eye protection film to be deformed at said upper periphery of said mask body.
